PNNL just confirmed they see the same issue on their end and they are working on it now.

Thanks, Taner. Much appreciated.

We had three people try to access it over here, all receiving the same error. I confirmed we are running the latest version of Java.

Hopefully the PNNL folks can get it sorted.

Thanks again and happy Friday,

-Rebecca

Hi Rebecca,

It appears that this is a GSDT wide issue as I am not able to launch modules either. I will reach out to the folks at PNNL.

Thanks,

-Taner Durusu

Thank you, Shari.

I appreciate the support. It is frustrating because I just logged on a few days ago and tested the system, specifically to avoid this issue. It worked fine earlier this week.

You are correct in that I did receive an out of office message from both Calvin and David. I also tried a contact I have at EPA HQ, Molly McEvoy, as she has helped me with access to the GSDT in the past, but she too, is out of the office. It is summer vacation time! 😊

Happy to work with Taner, if available, this afternoon.

Thanks again,
-Rebecca

Hi Rebecca

I think everyone is off for the holiday today, but I am pulling in Taner Durusu, who is our GSDT technical expert.

I'm not sure if he's working this afternoon, but if not, he can help on Monday.

It seems Murphy's law has struck again. I logged on to the GSDT this morning to begin uploading our updated Class VI permit application documents but am unable to access any of the site's modules. I receive a Java Application Error when attempting to launch the reporting tool.

I have pasted a few screenshots of the error messages below. I have also attached Application Error Details, that I copied and pasted from the Java error message.

I had a few others attempt to launch the reporting tool as well but get the same error. So, we are thinking it may be an error with the program.

Is this something you can help with?

In order to submit information through this tool, you must complete, notarize and submit a hardcopy of the Electronic Signature and Use Agreement. If you have any questions, please contact your permitting authority.

Project ID: R09-CA-0002

Select the desired reporting tool:

- ☐ **Project Information Tracking:** this module allows users to enter basic project information and guides them through the submission of Class V approval of injection operations, and submissions associated with permit modifications. View user guide.
- ☐ **Area of Review and Corrective Action:** this module (also known as the "input advisor") collects information on the computational model used for characterization and corrective action information. View user guide.
- ☐ **Financial Responsibility Demonstration:** this module is used to submit financial responsibility demonstration instruments. View user guide.
- ☐ **Pre-Operational Testing:** this module supports the submission of pre-operational testing data for Class VI wells prior to commencing injection. View user guide.
- ☐ **Project Plan Submissions:** this module supports the submission of project plan information, including Remedial Response Plan. View user guide.
- ☐ **Alternative PISC Timeframe Demonstration:** this module is used to submit alternative PISC timeframe demonstration information. View user guide.
- ☐ **Injection Depth Waivers and Aquifer Exemption Expansions:** applicants may use this module to submit an injection depth waiver application or expansion. View user guide.
- ☐ **Non-Endangerment Demonstration:** this module is used to submit a demonstration, prior to receiving authorization for site closure, that no activity does not pose an endangerment to USDWs. View user guide.
- ☐ **Injection and Post-Injection Phase Reporting:** this module is used to submit various required reports, e.g., testing and monitoring reports during injection phases, well plugging-related reporting, site closure-related reporting, and occasional notifications. View user guide.
- ☒ **Information Request:** this module is used to respond to Requests for Additional Information, Notices of Deficiency, and other Class VI reporting requirements. View user guide.
